Summary

System Engineer at Infosys with experience in enterprise software development and full-stack web application development using Python, Flask, and SQL. Currently contributing to an enterprise software project for Apple and actively building expertise in Java, DSA, LLM, and Generative AI.

Experience

Infosys Ltd.

System Engineer

Nov 2025 – Present

Mangalore, Karnataka

- Currently contributing to an enterprise software project for **Apple**, collaborating within an Agile development environment and participating in project onboarding, environment setup, and knowledge transfer activities.
- Successfully completed Infosys Foundation Training (Python Open Source Stream) with a **76% overall score**, covering Java, Python, MySQL, Unix/Linux, Flask, HTML, CSS, MongoDB, and Agile methodologies.
- Developed **InfyMart**, a full-stack retail management application using Python, Flask, MySQL, HTML, CSS, MongoDB, and Git as part of the enterprise capstone project.
- Served as Scrum Master for a 3-member Agile team, coordinating sprint planning, task allocation, progress tracking, and collaborative development using Git.

Projects

InfyMart – Retail Management Platform | *Python, Flask, MySQL, HTML, CSS, Git*

- Developed the **Admin module** for a multi-role retail management platform supporting user, retailer, inventory, product, and order management.
- Built backend functionalities using Flask and MySQL while implementing authentication and role-based access control.
- Collaborated in a 3-member Agile team and served as Scrum Master, coordinating sprint planning, task tracking, and version control using Git.

Jarvis Virtual Assistant | *Python*

- Developed a voice-controlled desktop assistant using speech recognition and text-to-speech technologies.
- Integrated external APIs to automate everyday tasks and improve user productivity through voice commands.

Salesforce CRM Application | *Salesforce*

- Designed and developed a CRM solution for laptop rental management with customer, inventory, and rental tracking functionalities.
- Implemented custom objects and workflows to streamline rental operations and improve data management.

Superstore Sales Dashboard | *Power BI, SQL*

- Built an interactive dashboard to analyze sales performance, customer trends, and business insights using SQL and Power BI.
- Applied data cleaning, visualization, and reporting techniques to support data-driven decision making.
